Windows & Gutters Catalog 2026

Windows · Patio doors · Seamless gutters · Gutter guards

The manufacturer product lines we install for homeowners across Macomb, Oakland, St. Clair, Sanilac, Tuscola and Lapeer counties: specs, colors, accessories, warranty highlights and how each one goes on your home.

BRANDS WE INSTALL

ANDERSEN WINDOWS & DOORS · Pella · JELD-WEN

WELCOME

How we work

Every Verified project starts with facts about your home, not a guess. You get a written, line-by-line proposal you can compare, and the same crew standards on every job.

1

Measured

We measure every roof plane, wall, opening and run of gutter, so quantities on your proposal match your house.

2

Photographed

We photograph existing conditions (decking, flashing, siding, trim, windows) and share what we find.

3

Priced line by line

Materials, accessories and labor are listed item by item. No lump sums, no surprises.

4

Everything included

Tear-off, installation, job-site cleanup and disposal of old material are part of every project.

Service area. Based in Shelby Township, serving Macomb, Oakland, St. Clair, Sanilac, Tuscola and Lapeer counties, with projects up to 150 miles away.

Using this catalog. Each brand page lists product lines, sizes and coverage, color names, matching trims and accessories, warranty highlights and the manufacturer's installation sequence in plain language. Pricing is quoted per project by your Verified rep. Colors are listed by name only. Ask for physical samples, since printed and on-screen colors are not accurate.

SECTION 04

04 Windows & patio doors

Replacement and new-construction windows and patio doors from Andersen, Pella and JELD-WEN, measured and installed by Verified crews.

Energy performance in Michigan

Michigan is in the ENERGY STAR **Northern** climate zone. Under ENERGY STAR version 7.0 (effective October 2023), a Northern-zone window needs a **U-factor of 0.22 or lower** (SHGC 0.17 or higher), or meets an equivalent-performance path: U 0.23–0.24 with SHGC 0.35+, or U 0.25–0.26 with SHGC 0.40+.

Meeting it usually takes triple-pane glass, or dual-pane Low-E with a room-side coating such as Andersen HeatLock. Performance depends on the exact unit and glass, so your quote lists the NFRC-rated U-factor for each window.

Tier	Andersen	Pella	JELD-WEN
Good	100 Series	250 Series	V-2500
Better	200 / 400 Series	Impervia	V-4500, Siteline
Best	A-Series	Lifestyle Series	—

True triple-pane options: Andersen A-Series; Pella 250 and Lifestyle; Pella Impervia on select styles; JELD-WEN V-4500 Energy Saver MAX; Andersen 100 Series on select units.

Our window installation process

1. In-home measure, plus product, color and glass selection. Windows are custom-built to the measurements.
2. Protect the interior with drop cloths; remove the old sash, stops and hardware (pocket install) or the full frame down to the rough opening.
3. Inspect the opening for rot; repair and flash the sill with a sill pan or flashing tape.
4. Set the new window plumb, level and square on shims and fasten it per the manufacturer.
5. Insulate the gap with low-expansion foam or backer rod, then seal the exterior.
6. Install exterior trim or aluminum capping and interior stops or casing; caulk.
7. Test operation, locks and screens; clean up and register the warranty.

Pocket or full-frame?

Pocket (insert) replacement keeps the existing frame and interior trim, for a faster, less disruptive install when the frame is sound. **Full-frame** replacement removes everything to the rough opening, so we can inspect, insulate and flash the whole opening. Your rep recommends one per opening.

VERIFIED ROOFING & SIDING × ANDERSEN

Andersen windows & patio doors

Series	Frame	Window styles	Patio doors	Glass highlights
100 Series	Fibrex composite (40% reclaimed wood fiber)	Single-hung, double-hung, gliding (incl. 3-sash), casement, awning, specialty	Gliding	Low-E, HeatLock, SmartSun, PassiveSun; triple-pane on select units

- **V-2500 sliding:** stainless track and metal rollers; 5'0" × 6'8" standard or custom; White; Low-E; optional blinds between glass and pet-door panel (pets up to 80 lb).
- **V-4500 sliding:** interior White, Almond or Desert Sand; exterior adds FiniShield Bronze and Black; Satin Nickel or Matte Black hardware; optional blinds between glass.
- **V-4500 Multi-Slide:** up to 6 panels on 2–4 tracks, up to 10' tall and 24' wide; multipoint lock; retractable screen upgrade.

Siteline wood & clad-wood windows

- AuraLast pine, alder or Douglas fir interiors with aluminum-clad exteriors.
- Casement, awning, push-out casement and awning, double-hung, segment and radius top, sliders, fixed and geometric, replacement kits.
- AuraLast wood is protected against rot and termites for as long as the owner occupies the home.
- Clad colors, interior finishes and hardware are selected from JELD-WEN's current Siteline chart.

SECTION 05

05 Gutters & guards

Seamless aluminum gutters formed on site to the exact length of each run, plus half-round for historic and premium homes, and guards to keep them flowing.

	5" K-style	6" K-style	6" half-round
Material	.027" or .032" aluminum	.027" or .032" aluminum	.032" aluminum (reverse bead); copper available
Coil width	11-3/4"	15"	—
Depth	—	—	about 3.25"
Downspouts	2" × 3" rectangular, .019"	3" × 4" rectangular, .019"	4" round, .019"
Hangers	Hidden screw-in, no-screw or stainless T-bar	Hidden screw-in, no-screw or stainless T-bar	Hidden reverse-bead hangers or exposed shank-and-circle hangers
Best for	Most homes	Large or steep roofs, heavy runoff	Historic districts and traditional homes

Seamless runs have no end laps. We recommend .032" aluminum and tight hanger spacing for Michigan snow and ice loads. Half-round runs come with end caps, inside and outside miters, color-matched screws and touch-up paint.

GUTTER COIL COLORS (ENGLERT)

Hi Gloss White · Lo Gloss White · Eggshell · Cream · Light Gray · Dark Gray · Ivory · Brown · Wicker · Bronze · Clay · Black · Musket

Coil colors vary by supplier; your rep shows the current chart.

Gutter guards

- Englert MicroGuard and SureGuard screens.
- Aluminum drop-in guards.
- Guards are installed after the gutters are hung and tested, and fit both new and existing seamless gutters.

✓ Warranty highlights

- Englert coil paint finish: limited 20-year, prorated.

Installation process

1. Inspect fascia and drip edge; replace rotted fascia boards first.
2. Measure runs and plan downspout locations; choose 5" or 6" and 2×3 or 3×4 downspouts for roof area and pitch.
3. Roll-form each run on site from coil as one continuous seamless length.
4. Cut outlets, install end caps, and seal miters and end caps with gutter sealant.
5. Hang gutters on hidden hangers screwed into rafter tails or fascia (about every 24" or closer), sloped toward the outlets.
6. Attach downspouts with elbows and straps, and direct water away from the foundation.
7. Install gutter guards if selected, then water-test the system.

Product specifications, dimensions, colors and warranty information are summarized from manufacturer literature as of 2025–2026 and may change without notice. Colors vary by region and production run, and printed or on-screen colors are not exact: select from physical samples. Warranty summaries are highlights only; the manufacturer's written warranty governs coverage, and some warranties require registration, specific accessories or a certified installer. Installation summaries describe the manufacturers' sequences for homeowner understanding and are not installation instructions. Product availability is confirmed at the time of order.
